1 The easy way to engrave your workpieces!

With TISIS, it is now easy to program engraving of your workpieces.

Two functions allow for easy programming:

- G973: for engraving a number
- G974: for engraving text

These two macros allow you to engrave on the face of the workpiece, on its mantle or on radial milling.

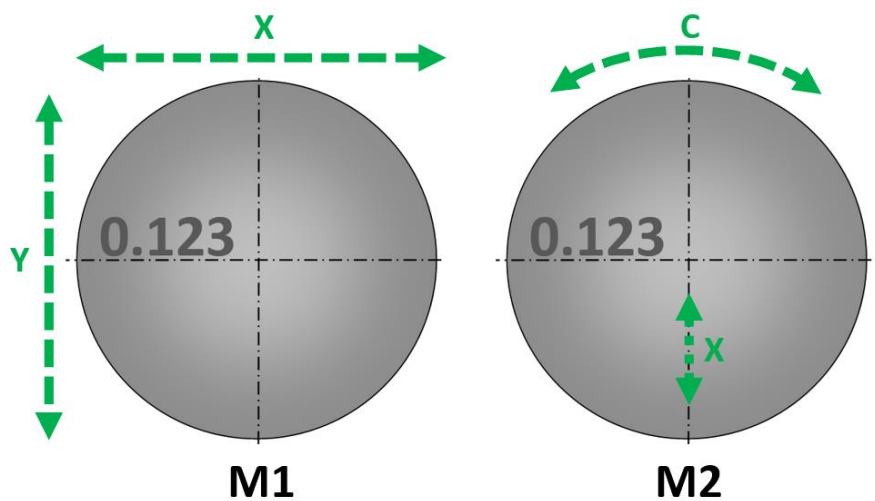

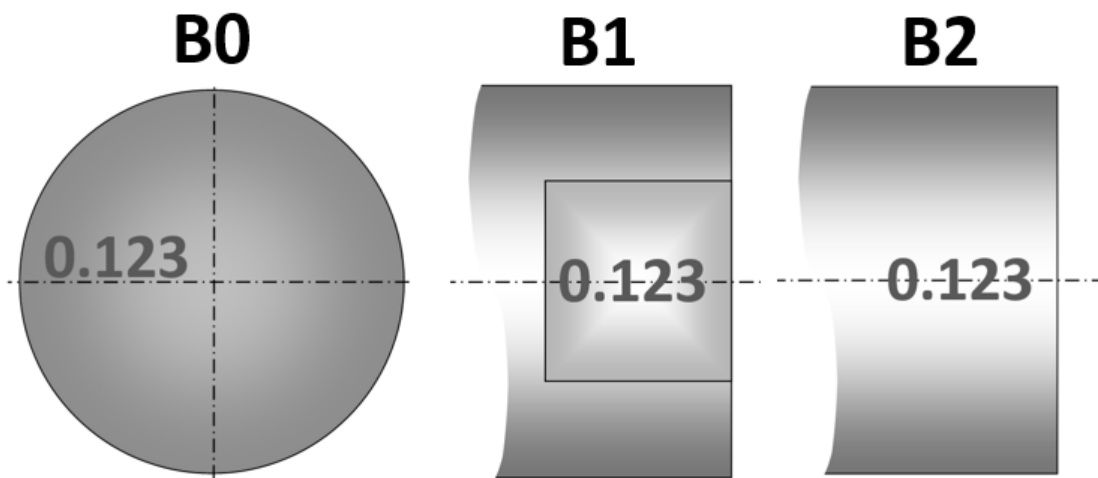

2 Engraving numbers with G973

Function G973 is used to engrave numbers.

The following can be configured:

- The number to be engraved
- The size of the engraving
- The position of the engraving

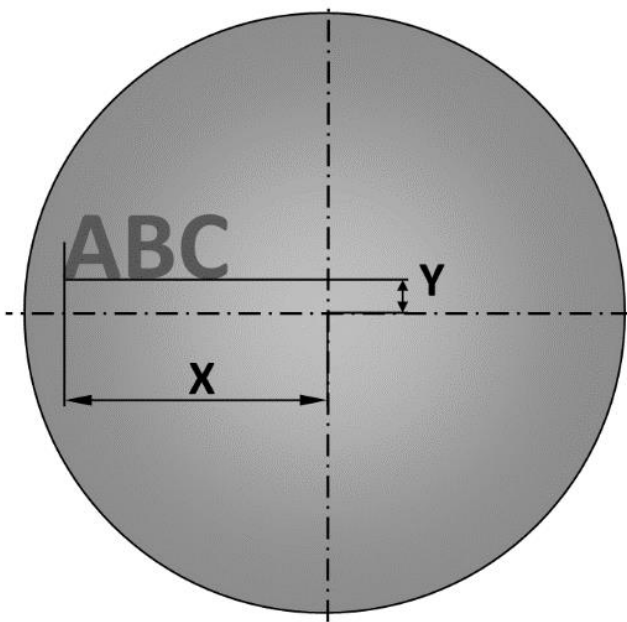

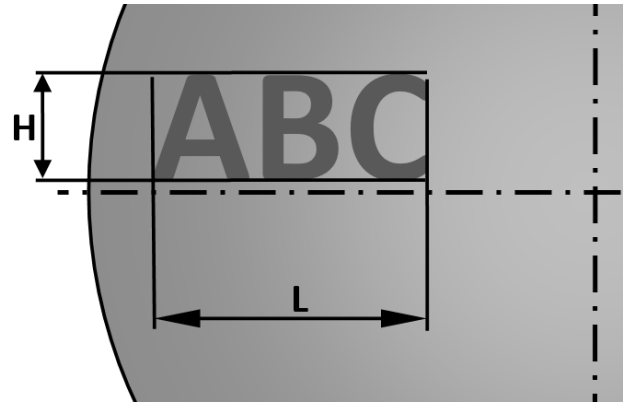

3 Engraving text with G974

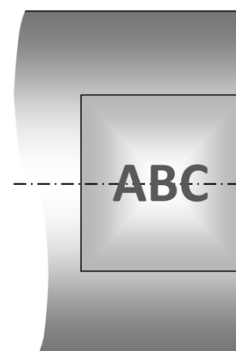

Function G974 is used to engrave text.

The following can be configured:

- The text to be engraved
- The size of the engraving
- The position of the engraving
